## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14, drawn to a method for testing whether a substance is or contains a cell growth inhibitor that acts by selectively inhibiting the function of a gene product required for cellular growth or survival.

Group II, claim(s) 15-31, drawn to a method for testing whether a substance is or contains an antibacterial agent.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The methods of Groups I and II are testing for different agents, e.g, a cell growth inhibitor vs an antibacterial agent. Accordingly, they have different objectives and utilize different reagents. Therefore, they do not relate to a single general inventive concept.

### ***Species Election***

3. This application contains claims directed to the following patentably distinct species:

Group I:

Species A: Recombinant cells are bacterial

Art Unit: 1645

Species B: Bacterial cells are fungal

Group II:

(For claims 19 and 20) Applicants must elect a single bacterial strain, e.g, *S.pneumoniae*.

(For claims 22 and 30) Applicants must elect a single gene selected from: gene selected from the group consisting of *fabF*, *pheT*, *murA*, *secA*, *dnaC*, *ileS*, *ftsZ*, *secl*, *polC*, *dnaE*, *gyrE*, *gyrA*, *murB*, *rpl*, *parE*, and *parC*.

(For claims 23 and 29) Applicants must elect a single target gene expression product: the RNA fragment is encoded to express a fatty acid synthase, an aminoacyl-tRNA synthetase, a protein secretase, a peptidyl transferase, a transglycosylase, a transpeptidase, or a ribosomal associated protein.

The species are independent or distinct because \*\*\*.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Art Unit: 1645

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
